

Fuel POS

Fuel Retail Solution

Smarter systems for fuel retail businesses

Fuel POS, Tokheim's industry-leading EPOS, helps you manage all aspects of your fuel and retail business. It combines an easy-to-use touchscreen interface with powerful management and analytical software tools. It allows you to connect seamlessly with all other systems on your service station including dispensers, indoor and outdoor payment, CCTV, tank level gauges, price pole-sign, back office and car wash. This level of integration makes life easier, helping to provide you and your staff with more time to better serve your customers.

“Fuel POS is a retail IT solution at the heart of successful businesses. Integrated intelligence across your service station network.”

A specialist system for smarter fuel retailing

With new equipment you want to be sure your investment is at the forefront of today's technology and right for tomorrow's fuel retailing environment. Fuel POS is designed to interface to a range of products via internationally recognised standards to provide you with a set of integrated systems that drive better business results.

Reliable and secure

Fuel POS is the preferred EPOS system for international oil companies and independents alike because its uptime is industry renowned. Your service station can rely on a solution that is fast, stable and 'future-proof'. Our payment security development meets the PCI's strictest requirements so you are better protected from fraud – now and in the future.

Integrated intelligence across your business

Fuel POS helps you to manage your overall business more effectively. The sophisticated reporting features help you evaluate where you are doing well and areas where you may be able to improve. Available reports include workforce management, shift reports, cash management, sales activities, access control and wetstock management.

Fuel Retail Solution

Fuel POS is the industry-specialist Point of Sale solution that has been chosen by oil companies and thousands of independent service stations to help run their businesses more effectively. It has a range of features and benefits that make it a truly complete EPOS, including:

User interface

Easy for staff to use with clear icons, audible alerts, simple pop-up windows, and carefully designed touchscreen layouts.

Marketing programs

A range of clever applications help improve your sales including E-Vouchers, Loyalty, Discounts (coupons/vouchers), Promotions, and Fuel Bonus applications.

Quick Service Restaurant (QSR)

Fuel POS is not all about fuel and shop items. A feature-rich QSR application provides you with a powerful solution for food and drinks that includes restaurant menus and table management functions.

Forecourt control

Connect to all types of fuel dispensers with ease through a fully integrated digital pump controller. The risk of drive-offs is reduced through built-in alerts, integrated video imagery and fuel prepayment features.

Wetstock & tank management

Smart wetstock management capabilities help reduce fuel losses and improve compliance. Fuel POS helps you manage your fuel as easily as you manage your stock.

eMIS management application

Fuel POS comes with an easy to use set-up application called eMIS. This powerful and intuitive software allows quick and accurate placement of data onto your new EPOS.

Integrated card payment

Fuel POS provides you with a secure payment platform that covers traditionally accepted payment methods such as Credit/Debit/Fuel Cards; and the latest emerging payment technologies such as smartphone payment (NFC).

Options connecting to Fuel POS

Outdoor payment

The Crypto VGA from Tokheim increases your options, makes your site more secure, helps reduce drive-offs and ultimately helps increase profit.

Back office

Fuel POS connects to hundreds of local back office suppliers via an internationally recognised BOC interface. Tokheim Konnect, our advanced back office system, fully integrates with Fuel POS to deliver a seamless user experience.

Closed cash handling

Safepay, our closed cash handling system, replaces manual tills with recycling cash systems. Payment is counted and correct change paid automatically. It helps improve security and reduce fraud onsite.

CCTV & security

Tokheim EYE is a complete security solution that is fully integrated with Fuel POS. The cashier can view images of the paying customer refuelling on their Fuel POS screen to avoid mix-ups.

Car wash integration

Fuel POS links directly to your Codax decoder and prints a unique 6-digit code for your customer on their receipt. Extra counter space is made available since there is no need for separate Codax Units.

Vehicle identification

SmartFuel is Tokheim's advanced vehicle identification solution that links directly to Fuel POS. SmartFuel authorises the transaction through a tag fitted to the vehicle; no paperwork is required.

Support and advice from the fuel retail specialists

Fuel POS has a powerful and in-depth set of tools to help you manage your shop and your wetstock. You and your staff can quickly find assistance through a detailed digital resource section that is integrated within the system. We know that getting the most out of your point of sale requires ongoing support. With Tokheim you get quality products

and professional service standards you can rely on. We have local service and support personnel in our Tokheim divisions and authorised service representatives around the world. We will be there with you every step of the way to ensure you get the most out of the products you choose from us.
